

DETOX BODY TREATMENT PROTOCOL **2-3 HOUR TREATMENTS \$125**

SAUNA- The frequency within an infrared sauna is known to reduce the ion bonds of the atoms that hold together molecules of water. As the frequency continues, breakdown of the water molecules occurs and encapsulated gases and other toxic materials are released. Scientists in Japan report that in the far infrared therapy wave treatment of clogged capillary vessels, a similar process occurs: heat expands the capillaries from far infrared therapy and then initiates the process to dissolve hidden toxins. Far infrared therapy has also been shown to improve nervous disorders, digestive disorders, weight loss, and normalize blood pressure.
